EDUCATION

The University of Melbourne

Jul 2024 - Jun 2027

Bachelor of Design | User Experience Design

EXPERIENCE

UI/UX Design Intern

Jun - Aug 2026

SPIRIT-AI | Beijing, China

- Designed and iterated PC, tablet and VR interface concepts for robotic teleoperation and maintenance, translating operational requirements into information architecture, interaction flows and high-fidelity prototypes.
- Developed visual directions for MozLink and Quanta, exploring brand-aligned UI styles and consistency across the company's robotics software ecosystem.
- Designed state-based HMI interactions, defining task controls, system feedback and interface behaviour across different robot operating conditions.
- Collaborated with product managers, robotics engineers and backend developers to clarify requirements, evaluate feasibility and refine designs through iterative reviews and walkthroughs.

UX/UI Designer & Website Developer

Aug 2025 - Present

Unimelb Rover Team

- Worked with team leads to define content needs, information architecture and Figma prototypes for a student, sponsor and team website.
- Built and maintain the WordPress website on Hostinger, including project showcases, sponsorship information, email subscriptions and social links.

Peer Mentor

Feb - Apr 2025

The University of Melbourne

- Helped first-year students navigate university resources through individual guidance and follow-up check-ins; collaborated with fellow mentors on inclusive orientation activities.

SELECTED PROJECTS

WEGO | Student connection & campus participation

Aug - Oct 2026

UX/UI design project

- Investigated student experiences through stakeholder research, interviews and prototypes across two iterative design cycles.
- Designed student verification, shared-interest connections and conversation starters to support event participation with peers.

PieFed | Usability evaluation

Jul - Nov 2025

University research project

- Planned and conducted evaluation using Tobii eye tracking, tree testing, first-click testing and UMUX-Lite; analysed findings into actionable recommendations.

SKILLS

Research & design: User research, information architecture, interaction design, usability evaluation, wireframing and high-fidelity prototyping.

Tools & implementation: Figma, Adobe Photoshop / Illustrator / InDesign, WordPress, HTML, CSS and JavaScript. ChatGPT for design exploration and assistance.
